Sequence 3, Application US/10109860
Patent No. US20020142421a1
GENERAL INFORMATION:
APPLICANT: SH40, Wei et al.
TITLE OF INVENTION: ISOLATED HUMAN AMINOACYLASE, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN AMINOACYLASE, AND USES THEREOF
FILE REFERENCE: CL001179DIV
CURRENT APPLICATION NUMBER: US/10/109,860
CURRENT FILING DATE: 2002-04-01
PRIOR PILING DATE: 2001-03-23
NUMBER OF SEQ ID NOS: 14
SEGNETARE: FastSEQ for Windows Version 4.0

Sequence 3, Application US/09799799
Patent No. US20020132291A1
GENERAL INFORMATION
GENERAL INFORMATION
TITLE OF INVENTION: ISOLATED HUMAN RAS-LIKE PROTEINS,
TITLE OF INVENTION: NOTLEIC ACID MOLECULES ENCODING THESE HUMAN RAS-LIKE
TITLE OF INVENTION: PROTEINS, AND USES THEREOF
FILE REFERENCE: CL001157
CURRENT APPLICATION NUMBER: US/09/799,799
CURRENT FILING DATE: 2001-03-07
NUMBER OF SEQ ID NOS: 5
SSCTUARE: FastSEQ for Windows Version 4.0
LENGTH: 88191
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Query Match 71.7%; Score 29.4; DB 10; Length 88191; Best Local Similarity 80.5%; Pred.
